

ECOSPERSE *High Performance Thinner for OBM's*

DESCRIPTION

ECOSPERSE is a thinner for the **ECOMUL** and **ECOMUL 100** oil base mud systems. It can be used in diesel, paraffin, mineral or synthetic base systems. It is used to control the viscosity and gels strengths of oil base systems that have high solids concentrations.

ADVANTAGES

Conditions all types of oil base muds
No need to dilute system
Used in low concentrations

APPLICATION

ECOSPERSE should be mixed in the oil base mud system slowly over one full circulation through the rig hopper. Treat system as needed with 1 - 2 ppb during drilling operations to thin mud. Be careful not to overtreat system in order to avoid barite settling.

TYPICAL PROPERTIES

Color.....Dark Viscous Liquid
Specific Gravity.....0.8 - 0.85

PACKAGING

ECOSPERSE is packaged in 55 gallon drums.
