

ECOWET

OIL MUD WETTING AGENT

DESCRIPTION

EcoWet is an oil wetting agent and supplemental emulsifier for **EcoMul** systems.

APPLICATION

EcoWet is added to **EcoMul** systems to oil wet barite and drill solids. It is used in high temperature applications. The system should be treated with **EcoWet** when the mud weight is increased with barite or when solids become water wet.

RECOMMENDED TREATMENT

Use **EcoWet** in the initial formulation at a concentration of 2 to 4 lbs/bbl (5.7 to 11.4 kgs/m³) for and invert system. Use as a treatment of water-wet solids at concentrations from 1/4 to 2 lbs/bbl (.71 to 5.7 kgs/m³).

TYPICAL PROPERTIES

Composition.....Amide type
Color.....Brown
Specific Gravity.....0.882 - 0.912
Flash Point.....152F (67C) PMCC

PACKAGING

EcoWet is packaged in 55 gal/drums (209 liters), 414 lbs (188 kgs.) net weight.

HANDLING

Flammable/combustible material. Avoid open flames or sparks. Otherwise normal storage and handling precautions for industrial chemicals should be taken.
