

# **ECONEX**

## **HIGH PERFORMANCE FILTRATION REDUCER**

### **DESCRIPTION**

**ECONEX** is resin and lignin based additive that provides superior fluid loss control in water based drilling fluids. **ECONEX** is resistant to contaminants such as salt and calcium, and can be used in high temperature environments. **ECONEX** reduces both API and HTHP filtration loss providing a more stabilized well bore when drilling troublesome formations.

### **ADVANTAGES**

- Reduces fluid loss in water based muds
- Prevents stuck pipe
- Stabilizes the bore hole
- Used in severe environments

### **APPLICATION**

**ECONEX** should be mixed through the mud hopper. Treat systems with 2-10 lbs/ bbl (5.6-28 Kg/ m<sup>3</sup>). Treat systems as needed while drilling for filtration control.

### **TYPICAL CHARACTERISTICS**

Thermal Stability:	375°F (190°C)
Solubility in Water:	50%
Color:	Black Powder

### **PACKAGING**

**ECONEX** comes in a 50 Lbs multi-walled paper export sacks, palletized and shrink wrapped. 50 sacks per pallet.

### **HANDLING & STORAGE**

Store in cool dry area. Use gloves, safety glasses, facial mask and long sleeves.
