

ECOTEX

SULFONATED ASPHALT

DESCRIPTION

ECOTEX is a sulfonated asphalt with soluble fraction in oil and water that permit the utilization of this product in water soluble or oil based muds.

ADVANTAGES

- Can work in any type mud system and is very effective at stabilizing formation and for fluid loss control.
- The high solubility content permits this product to obtain higher penetration in the formation therefore resulting in better stabilization.

APPLICATION

ECOTEX is a complete additive for reducing HT/HP filtration loss and forms a thin flexible filter cake, reducing torque and drag. **ECOTEX** seals small fractures in stressed shale formations and minimizes spurt loss or seepage into a permeable zone.

TREATMENT

Recommended treatment for **ECOTEX** is 2-6 lb./bbl.

PROPERTIES

Appearance.....Dark powder
Solubility.....Water/oil
pH @ 1%.....9.5 to 11.0
Thermal Stability.....To 400°F

HANDLING

ECOTEX utilize normal precaution when handling chemical products. Use of gloves, goggles, and apron is recommended for employee comfort and protection. See Material Safety Data Sheet for this product.

PACKAGING

ECOTEX is packaged in 50lb. Sacks.
